RELOCATION GUIDE
WITH BUYER & SELLER GUIDE

Meet THE COLLINS TEAM

Daniel Collins & Jeff Collins

Hi, we are Daniel Collins and Jeff Collins; The COLLINS TEAM. We are longtime friends and business partners who bring together two different backgrounds to make one highly successful real estate team – The COLLINS TEAM. As young, hardworking, business minded individuals we take real estate to the next level. Our growing

business has led us to be the #1 buyers agents and top selling team, in our market, in just a few short years. Our leadership and tech savvy marketing skills have lead us to grow into areas outside of Lake Havasu City including: Bullhead, Kingman, Flagstaff, and Sedona!

In August 2014, we opened a Realty ONE Group franchise with three offices in Flagstaff, Prescott, and Lake Havasu City. This new brand provides more leverage and marketing power to better serve our clients. Realty ONE Group is one of the fastest growing real estate companies in the US with over 5000 agents and 50 offices. We are aggressive, hard-working Realtors® who are happy to assist you with all your real estate needs. Call us today (928) 275-1152

Introduction to take Havasu City

Lake Havasu has something to offer everyone. Lake Havasu takes center stage, a blue oasis stretching forty-five miles with over four hundred miles of scenic shoreline. Lake Havasu can take you from the Parker Dam to the south all the way up to Laughlin going north. When you're not boating you might find yourself out in the desert – running, hiking, camping, or off-roading. With thousands of miles of trails accessible within minutes, you can explore the desert every day for years and still not discover all the abandoned mines, interesting trails, washes, and vistas.

The city itself was established in 1963 by Robert P. McCulloch as a self-sufficient, planned community and it was incorporated in 1978. Lake Havasu has come a long way from its humble beginning as an Army Air Corps rest camp during World War II.

Lake Havasu City is home to the world-famous London Bridge. It's a recreational mecca for boating, off-roading, mountain biking, fishing, golf, and a popular retirement community. Tourism remains a major contributor to the economy with 1,000,000 annual visitors contributing over \$75 million.

Our community features a broad range of services, including a shopping mall, hospital, airport, two movie theatres, theatrical arts, library, and large aquatics complex.

Climate in Paradise

IT'S TRUE. YOU DON'T SHOVEL SUNSHINE. Lake Havasu City has an arid desert climate. In the winter months, daytime highs usually range from 63 °F to 82 °F. Lows in winter average between 42 °F to 60 °F; temperatures do occasionally dip below 40 °F, but frost is virtually unknown in the area.

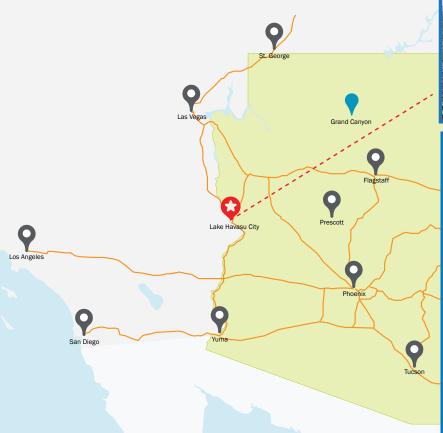

The city has hot summers, with highs remaining between 109 °F and 125 °F. Overnight low temperatures stay between 80 °F to 96 °F for the months of July and August, and range from 72 °F to 82 °F in September.

Mean annual precipitation is 4.29 inches. The annual mean temperature is 75.6 °F (24.2 °C).

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Year

What's Nearby Lake Havasu City?

In between (sort of) Lake Havasu City & Las Vegas is Laughlin, Nevada.

There are nine hotel/casinos and one motel in Laughlin providing over 10,000 rooms, 175,000 square feet of meeting space, 60 restaurants, two museums, a 34-lane bowling center, an outlet shopping mall and a variety of boutiques, spas and salons. More than 14,000 casino workers now cross the Colorado by shuttle boat or the Laughlin Bridge each day.

The city by the Colorado River now attracts nearly 2 million visitors annually who visit Laughlin to gamble, enjoy water sports on the Colorado and attend many high-profile special events hosted by the community.

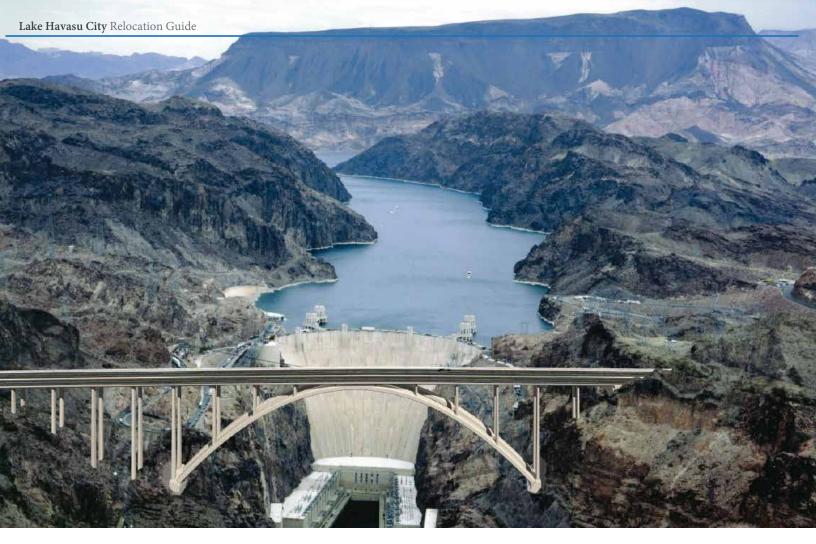

This resort destination boasts a multitude of unspoiled attractions, abundant golf and spas, year 'round, near perfect weather, and even a wedding chapel or two.

Hoover Dam

Distance: 130 Miles

Hoover Dam impounds Lake Mead, the largest reservoir in the United States by volume. Today, close to 1,000,000 visitors a year take the tour and millions more drive across the dam.

The Hoover Dam Visitor Center offers educational exhibits, interactive displays and films about the dam and its construction. Here, visitors can purchase tickets to either of the dam's tours. At the top of the three-level structure is a rooftop overlook. You will find restrooms on both the first level and the Theater and Exhibit levels of the visitor center, in the dam's downstream towers and next to the Old Exhibit Building. Food is available in the gift shop at the base of the parking garage.

Lake Mead National Recreation Area

Distance: 67 Miles

Lake Mead National Recreation Area offers a wealth of things to do and places to go year-round. Its huge lakes cater to boaters, swimmers, sunbathers, and fishermen while its desert rewards hikers, wildlife photographers, and roadside sightseers.

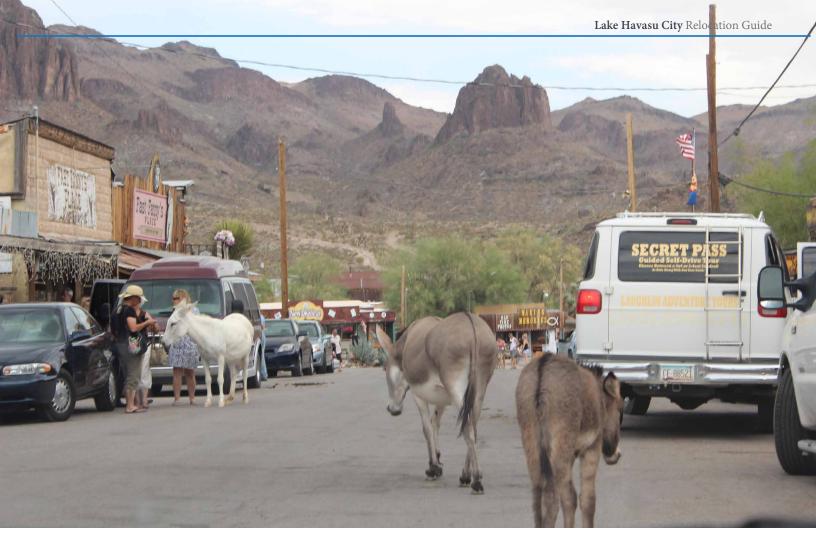

Three of America's four desert ecosystems--the Mojave, the Great Basin, and the Sonoran Deserts--meet in Lake Mead NRA. As a result, this seemingly barren area contains a surprising variety of plants and animals, some of which may be found nowhere else in the world.

Katherine Landing

Distance: 73 Miles

A complete lakeside resort area with marina, boat and jet ski rentals, waverunners and sea doo rental's, plus a sandy beach area where you can picnic and barbecue. Campground spots with and without RV hook-ups are available. There is also a motel, boat storage yard, boat repair shop, store, restaurant, and lounge.

Katherine's Landing is located on the Arizona side of the Colorado River in the Lake Mead National Recreational Area.

Oatman

Distance: 54 Miles

Perched on the rugged rocks of the Black Mountains at an elevation of 2,710 ft. is the living ghost town of Oatman. This former gold mining town, 28 miles from Kingman, on Historic Route 66 is as untamed and original as it was in its heyday in mid to late 1800's.

The town and its 300 or so residents include artists, writers and musicians along with a colony of wild burros (descendants of old miner's burros) who roam the streets during the day, seeking handouts, then disappearing into their desert home at night.

Oatman's rough-hewn Main Street (Route 66) has been featured in several movies. Its three saloons, with their unpainted wooden floors and outside walkways are as they were in the late 1800's. Oatman today is a tourist town. The main street is lined with shops and restaurants. Wild burros, descendants of those brought by long ago miners, wander the streets. Gunshots are heard as the Ghostrider Gunfighters perform daily, displaying blazing six-gun shootouts in the middle of main street.

Parker

Distance: 38 Miles

Have a boat? Great. And no worries if you don't. Because this 16-miles of Colorado River, known as the Parker Strip, has a wide availability of rentals for you to enjoy the river's shoreline throughout most of the year. You can keep it calm with an easy float down the river or strap in for a wild parasail ride and 500-foot aerial view.

Of course, it's not all about the water. Parker is home to Emerald Canyon Golf Course with rolling buttes and challenging holes. The nearby town of Swansea remains one of the best mining ghost towns in the state with dusty saloons and abandoned restaurants. You can also learn all about the Colorado River Indian Tribes—Mohave, Chemehuevi, Navajo, and Hopi—at the CRIT Museum.

If you're feeling lucky, you can double down with some riverfront excitement at BlueWater Resort and Casino. And in case you get a craving for more action, just jump on their Wakeboard Island, a two-tower, cable pulley system that turns the marina into a wakeboard park.

What We Love: Boating & Watersports

Lake Havasu is known for it's watersports - from recreational boating to world-class watercraft racers. All types of water recreation can be found here including aqua cycles, bumper boats, jet skis, ski boats, pontoons, fishing boats, houseboats, sail boats, kayaks, canoes, stand-up paddle boarding, and parasailing. If you don't have your own equipment these can all be rented from local area businesses.

The Lake

Lake Havasu remains at a near constant water elevation that rarely varies more than four feet, providing boaters with ideal conditions year-round and contributing to its reputation as one of the best boating lakes around. The average depth of Lake Havasu

is 35 ft, with the deepest point being approximately 90 ft.

Water temperatures range from 75 to 85 degrees during much of the year, perfect for a quick dip.

Fishing

Lake Havasu boasts the best year-round fresh water fishing in Arizona and California. One can find bass, crappies, bluegills, carp and catfish in the many coves and inlets. Take-off Point, Mesquite Cove, Havasu Springs and Site Six are all fishing access areas.

The Lake Havasu Fish Hatchery and The Havasu Fisheries Project are very important for future generations of fisherman. They are instrumental in bringing back several species of fish that disappeared with the construction of Parker Dam. Seven isolated coves have been set aside to raise the populations of bonytail chub and razorback suckers. After they reach twelve inches in length they are released into the lake.

Along the 450 miles of shoreline at Lake Havasu, you will find sandy beaches, perfect weather and campsites. Lake Havasu in the desert southwest is a great place for water sports and camping.

Where to Go Boating

Bridgewater Channel

Every day is a virtual non-stop boat parade when you're at the Bridgewater Channel, the narrow ribbon of 'no wake' navigable water that runs beneath the London Bridge creating a waterfront for shops and restaurants. The southern end of the man-made channel is bordered by sandy beachfront, a favorite resting, socializing and tanning place for boaters to "beach' during spring, summer and early fall.

Copper Canyon

In years past, Copper Canyon was considered Lake Havasu's number one gathering place for boaters looking to party. Today, Copper Canyon, still popular with boaters and as breathtakingly beautiful as ever, offers a bit calmer, more serene atmosphere. The entrance to the canyon cove is now marked with "no wake" buoys and an open access lane is maintained for increased safety.

Grass Island

Grass Island marks the beginning point of Lake Havasu's lower southern portion, the gateway to places like Copper Canyon, Friendly Island, Steamboat Cove and Havasu Springs. Grass Island varies greatly in size depending upon the water level of the lake. At times of high water marks, the island is almost totally hidden. However, boaters need to take particular care when approaching the island because of shallow waters and very rocky bottoms surrounding the shoreline.

Balance Rock

In the far reaches of Balance Rock Bay at the northeastern most point is a masterpiece of natural erosion at work. Sitting atop a slip pedestal of softer conglomerate rock is a solid mushroom-shaped mass which weighs many tons. The pedestal base was formed over thousands of years thanks to natural stream erosion removing the softer lower rock material below at a faster rate than the more dense rock above. You can boat right up to it or hike to it.

Red Rock

The afternoon sun lights up the cliffs of Red Rock cove as though they are almost on fire. Located just north of Pilot Rock on the Arizona side of the river, Red Rock is a popular bass and striper fishing ground for late day anglers. The color intensity of the red rock cliffs is so vivid that the water immediately beneath the cliffs turns a deep amber color as well. Boaters are able to safely approach the cliffs for a closer look as this portion of the lake is among the deepest sections of the southern end.

The Passion of Learning: Education

Lake Havasu City is served by the Lake Havasu Unified School District. There are currently six elementary schools, one middle school, one high school, and several alternative and private schools in the city.

A campus of Mohave Community College is located in Lake Havasu City. Arizona State University opened a new lower-tuition 4-year college campus in Lake Havasu City in August 2012.

Caring Healthcare

Havasu Regional Medical Center is a patient-centered community hospital with the resources and the technology to serve as a regional healthcare provider. It's a compassionate place that combines the best in local hometown care with the latest in world-class medical technology.

Havasu Regional Medical Center is a The Joint Commission-accredited, Medicare-certified 171-bed hospital located in Lake Havasu City, Arizona. Havasu Regional Medical Center is a joint venture between PHC-Lake Havasu, Inc. and many community physicians. Through this ongoing collaboration, we are able to identify and focus on the elements that make for a quality-driven healthcare environment for our patients. Havasu Regional Medical Center is partially owned or invested in by physicians.

As a community hospital and a regional referral center for healthcare, Havasu Regional Medical Center offers a broad and comprehensive scope of services in major medical disciplines. A medical staff of more than 100 affiliated physicians represents a broad cross-section of expertise in 31 medical specialties.

Havasu Regional Medical Center provides 24-hour emergency service with full-time emergency physicians on duty. The hospital has also earned an ALS Base Hospital Certificate from the State of Arizona, authorizing medical direction and support of pre-hospital care providers such as fire department and ambulance personnel.

Through the years, HRMC has

expanded, updated and remodeled to meet the ever-changing needs of the community. This growth has touched nearly every area of the hospital – from the admitting area and emergency department to the patient rooms, labs and outpatient services.

In addition to general radiology services, HRMC's Diagnostic Imaging Department offers CT and PET scans, MRI, nuclear medicine and digital mammography technology. Complete cardiovascular care is available in HRMC's Havasu Heart Centre. Diagnostic cardiac catheterization and specialized interventional radiology services such as angiography, vascular angioplasty and stent placement are performed in state-of-the-art cardiac/vascular catheterization labs.

Specialized Cardiothoracic and Vascular surgery is performed in the Havasu Heart Centre with the latest technology and equipment. The Cardiac Rehabilitation program emphasizes exercise, education, counseling and behavioral modifications as patients are given the tools they need to make heart health a lifelong goal

The hospital's Cancer Treatment
Center, with linear accelerator
technology, provides radiation and
medical oncology services. The hospital
also operates the Havasu Surgery
Centre, a state of the art outpatient
surgery clinic. A pain management
clinic is also available. HRMC's
Advanced Spine Program provides
patients with the most advanced spine
and neurosurgery care in the region,
including treatment for complex brain

tumors, brain and spine trauma, and minimally invasive spine surgery. In addition, home healthcare is available through Havasu Regional Medical Center's Home Health Department. Outpatient physical, occupational and speech therapy are also available through the hospital.

Top 10 Employers

The average household income in Lake Havasu City is \$59,415 and the median household income is \$43,989. Over 20% of Lake Havasu City households have an income between \$50,000 and \$74,999. Cost of living at 109.7% of the Composite Index is slightly higher than the Arizona average but still significantly lower than most of Southern California's metropolitan areas. Lake Havasu City History

In the early 1800's beaver and bear trappers set up camps along the river where Lake Havasu City stands today. By 1830 these trappers had been chased away by the Mojave Indians. Later, Spaniards replaced these camps with mining camps. With the great need for water, the Parker Dam was constructed in 1938, flooding these camps forever. Fishing camps were the next to follow.

During World War II the Army Air Corps used this area as a testing site known as Site Six. The camp areas were used as barracks and the nearby peninsula as a recreation area for the airmen. By the early 1960s the airmen were gone and the fishermen were back. Industrialist Robert McCulloch Sr., while flying over the area, thought it would be the perfect place for testing his company's outboard boat motors.

McCulloch purchased 3,500 acres in the peninsula area. He had a 100-unit mobile home park built for the workers. In 1963 he bought a 26-mile area for under \$75 an acre. McCulloch then turned his interests to making Lake Havasu a retirement community. The Lake Havasu Hotel was built, McCulloch International Airlines was started, real estate agents were put in place and 40 white Jeeps were purchased, all in anticipation of prospective buyers. The 11 airplanes that comprised McCulloch International Airlines were

used to bring prospective buyers in for free. The Jeeps were used by real estate agents to show them around the area. McCulloch then decided to start a chainsaw manufacturing plant to stimulate the economy. There were 3 factories with 400 employees.

In the early 1960's, it was discovered that 130-year old London Bridge was slowly sinking into the Thames River. Not wanting to demolish the bridge, London decided to hold an auction for the bridge. Always the great promoter, McCulloch thought it would be the perfect attraction for his growing city. His bid of \$2,460,000 was the winning bid. It took 3 years to transport it across the ocean and through the Panama Canal to its present location. At a cost of about \$8 million, it was reconstructed brick by brick and a channel was dredged under it. It opened for business on October 10, 1971. A paper mache exact replica of the old horse drawn English Royal Coach (which is on display at the London Bridge Resort) was given to McCulloch for purchasing the bridge.

By 1975 the population had reached 15,500. The free flights were discontinued in 1978. It was estimated that about 137,000 prospective buyers had made this flight.

The Real London Bridge

The stone London Bridge was begun around the year 1176, and completed in the early years of the 13th century. The first 'London Bridge' was Roman, and probably built of timber. However, the earliest written reference to a London Bridge can be found in the section in the Saxon Chronicles that deals with the later tenth century.

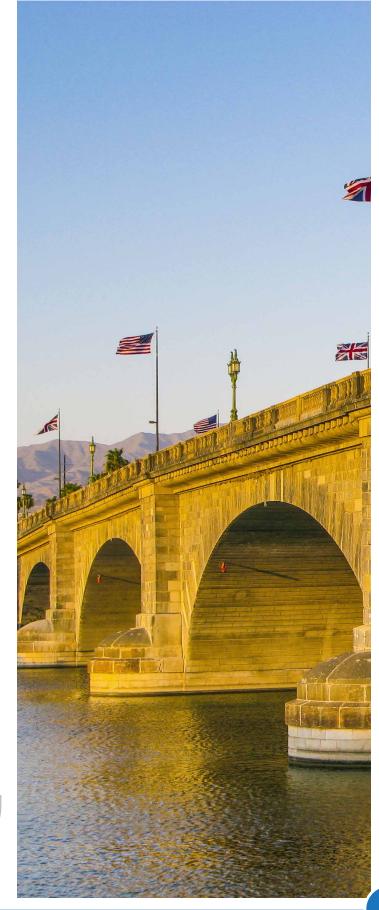

During the 30 years that it took to build, the bridge cost the lives of an estimated 150 workmen. The wooden Roman and Saxon London Bridges were vulnerable to fire and flood, so Peter de Colechurch was determined to build a lasting bridge of stone. The 1831 bridge was the last project of engineer John Rennie and was completed by his son John Rennie the younger .

In 1666, the houses on London Bridge were saved from the Great Fire of London, thanks to an earlier fire in 1633 - which had destroyed the houses close to the north bank. Consequently, there wasn't enough material left for a major fire to ensue. In the mid 1700s, the houses on the bridge were removed completely, and a larger middle arch was created, by removing one of the piers (or starlings).

In the 1820's a new London Bridge was built, north of the old one, and this opened in 1831. In that same year, the destruction of the old bridge began in earnest, after it had been in place some 622 years.

In the 1960's, the London Bridge of 1831 was transported, stone by stone, to Lake Havasu, Arizona.

The bridge cost the lives of an estimated 150 workmen.

Enjoy Year Round Golf

Nothing can beat teeing off at any of the top golf courses in Arizona like those found here in Lake Havasu City, where golfers are surrounded by sun-painted rock formations and the shimmering waters of Lake Havasu and the Colorado River.

Our Arizona golfing adventures include scenic 9- and 18-hole courses suitable for any skill level. The climate here allows for almost year-round golf on some of the best golf courses, so escape the winter chill and get ready to sharpen your skills on one of our Lake Havasu City golf courses. After a glorious round of golf under a brilliant blue sky, golfing fans can go hit the 19th hole at any one of our many fine lounges you'll discover nearby.

If you're looking for some of the most scenic and enjoyable top golf courses in Arizona, be sure to check out those listed below - all located within a 90-minute drive of Lake Havasu City, including courses in eastern California and southern Nevada. One thing you won't hear about from most golf courses is value. We believe that when it comes to a great Arizona golfing experience, quality and accessibility should go hand-in-hand. With features suited to a wide range of

playing interests and abilities, these courses offer something for golfers at every level. All are open to the public so you won't have to worry about any high-priced, snooty private clubs shutting you out from a great day on the links!

With all it has to offer, there's something truly special about golfing in and near Lake Havasu City. Great scenery, unbeatable weather and all for less than what you may pay in most other golf destinations.

Senior Resources

Mohave County has the highest population per capita in the state of the senior age group of 65-74 years old. It is estimated that 26.9 percent of the population in Lake Havasu City is over age 65 with the median age being 50 years old.

Senior Citizen Crime Prevention Committee

The Senior Citizen Crime Prevention Committee was founded by the Lake Havasu City Police Department in 1996. The committee is comprised of representatives of the American Association of Retired Persons (AARP), the Lake Havasu Senior Center and the Lake Havasu City Police Department. The group is an advisory committee to the Chief of Police with the goal of reducing the fear of crime and enhancing the quality of life for Lake Havasu City's senior citizen population. The committee organizes periodic community forums with the intent of informing senior citizens of the various local services available to them. The programs have ranged from telemarketing schemes to explaining the differences between living wills, power of attorneys, conservator, and guardianship.

Directory of Community Services for Senior Citizens

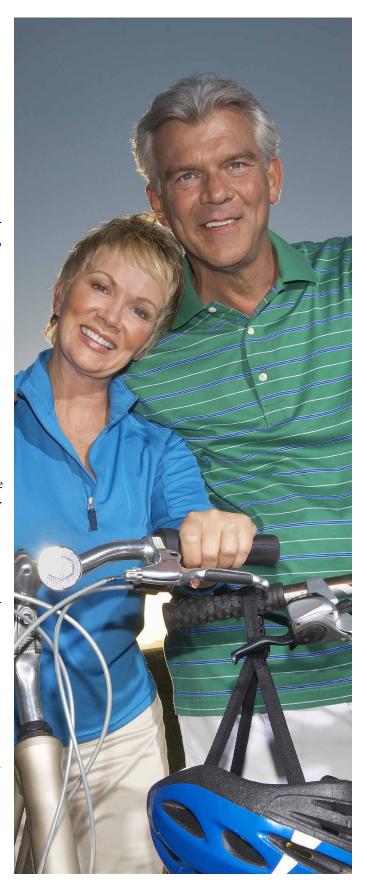

The Lake Havasu City Police Department has published a phone directory of services that are available for seniors. The directory has contact information for Adult Day Care, Case Management, Counseling, Financial Assistance, Home Care, Legal Services, Long Term Care, Nutrition, Support Groups and more. The directory is extremely helpful to caregivers or family members that are living outside the Lake Havasu area and are not familiar with what assistance might be available. The directory is available free of charge and can be found at many community and city offices in Lake Havasu.

Other Senior Resources

Lake Havasu Senior Center

Mohave County Senior Centers offer a place where seniors can gather for enjoyable activities, nutrition, social interaction, and seminars. Come and See, its a great place to be!

> 450 Acoma Blvd., S. Lake Havasu City, AZ 86406 (928) 453 - 0715

Live Theatre on Main Street

If you enjoy live theatre you'll be pleased to learn about Grace Arts Live. Located in the heart of downtown Lake Havasu, the threatre features 6 - 8 major shows annually with a few smaller shows mixed in throughout the year.

Visit their website or call to get their most current show schedule. Past shows include Grease, West Side Story, Les Miserables, Man of La Mancha, and many more.

Grace Arts Live 2146 McCulloch Blvd. Lake Havasu City, AZ 86403 (928) 505-2787 www.graceartslive.com

WHY YOU SHOULD WORK WITH A REALTOR®

Not all real estate agents are REALTORS®.

The term REALTOR® is a registered trademark that identifies a real estate professional who is a member of the NATIONAL ASSOCIATION of REALTORS® and subscribes to its strict Code of Ethics. Here are nine reasons why it pays to work with a REALTOR®.

1. YOU'LL HAVE AN EXPERT TO GUIDE YOU THROUGH THE

PROCESS. Buying or selling a home usually requires disclosure forms, inspection reports, mortgage documents, insurance policies, deeds, and multi-page settlement statements. A knowledgeable expert will help you prepare the best deal, and avoid delays or costly mistakes.

2. GET OBJECTIVE INFORMATION AND OPINIONS. REALTORS* can

and opinions. REALTORS* can provide local community information on utilities, zoning, schools, and more. They'll also be able to provide objective information about each property. A professional will be able to help you answer these two important questions: Will the property provide the environment I want for a home or investment? Second, will the property have resale value when I am ready to sell?

3. FIND THE BEST PROPERTY OUT THERE. Sometimes the property you are seeking is available but not actively advertised in the market, and it will take some investigation by your REALTOR® to find all available properties.

4. BENEFIT FROM THEIR

NEGOTIATING EXPERIENCE. There are many negotiating factors, including but not limited to price, financing, terms, date of possession, and inclusion or exclusion of repairs, furnishings, or equipment. In addition, the purchase agreement should provide a period of time for you to complete appropriate inspections and investigations of the property before you are bound to complete the purchase. Your agent can advise you as to which investigations and inspections are recommended or required.

5. PROPERTY MARKETING

POWER. Real estate doesn't sell due to advertising alone. In fact, a large share of real estate sales comes as the result of a practitioner's contacts through previous clients, referrals, friends, and family. When a property is marketed with the help of a REALTOR®, you do not have to allow strangers into your home. Your REALTOR® will generally prescreen and accompany qualified

prospects through your property.

6. REAL ESTATE HAS ITS OWN

LANGUAGE. If you don't know a CMA from a PUD, you can understand why it's important to work with a professional who is immersed in the industry and knows the real estate language.

7. REALTORS® HAVE DONE IT

only a few homes in a lifetime, usually with quite a few years in between each purchase. And even if you've done it before, laws and regulations change. REALTORS®, on the other hand, handle hundreds of real estate transactions over the course of their career. Having an expert on your side is critical.

8. BUYING AND SELLING IS

EMOTIONAL. A home often symbolizes family, rest, and security — it's not just four walls and a roof. Because of this, home buying and selling can be an emotional undertaking. And for most people, a home is the biggest purchase they'll ever make. Having a concerned, but objective, third party helps you stay focused on both the emotional and financial issues most important to you.

9. ETHICAL TREATMENT.

Every member of the NATIONAL ASSOCIATION of REALTORS® makes a commitment to adhere to a strict Code of Ethics, which is based on professionalism and protection of the public. As a customer of a REALTOR®, you can expect honest and ethical treatment in all transaction-related matters. It is mandatory for REALTORS® to take the Code of Ethics orientation and they are also required to complete a refresher course every four years.

QUESTIONS TO ASK WHEN CHOOSING A REALTOR®

Make sure you choose a REALTOR® who will provide top-notch service and meet your unique needs.

- 1. HOW LONG HAVE YOU BEEN
 IN RESIDENTIAL REAL ESTATE
 SALES? Is it your full-time job? While
 experience is no guarantee of skill, real
 estate like many other professions
 is mostly learned on the job.
- 2. WHAT DESIGNATIONS DO YOU HOLD? Designations such as GRI and CRS® which require that agents take additional, specialized real estate training are held by only about onequarter of real estate practitioners.
- YOU AND YOUR REAL ESTATE BROKERAGE SELL LAST YEAR? By asking this question, you'll get a good idea of how much experience the practitioner has.

3. HOW MANY HOMES DID

- 4. HOW MANY DAYS DID IT TAKE YOU TO SELL THE AVERAGE HOME? How did that compare to the overall market? The REALTOR* you interview should have these facts on hand, and be able to present market statistics from the local MLS to provide a comparison.
- 5. HOW CLOSE TO THE INITIAL ASKING PRICES OF THE HOMES YOU SOLD WERE THE FINAL SALE PRICES? This is one indication of how skilled the REALTOR* is at pricing homes and marketing to suitable buyers. Of course, other factors also may be at play, including an exceptionally hot or cool real estate market.
- 6. WHAT TYPES OF SPECIFIC

MARKETING SYSTEMS AND APPROACHES WILL YOU USE TO SELL MY HOME? You don't want someone who's going to put a For Sale sign in the yard and hope for the best. Look for someone who has aggressive and innovative approaches, and knows how to market your property competitively on the Internet. Buyers today want information fast, so it's important that your REALTOR® is responsive.

7. WILL YOU REPRESENT ME
EXCLUSIVELY, OR WILL YOU
REPRESENT BOTH THE BUYER
AND THE SELLER IN THE
TRANSACTION? While it's usually
legal to represent both parties in
a transaction, it's important to
understand where the practitioner's
obligations lie. Your REALTOR* should
explain his or her agency relationship
to you and describe the rights of each
party.

8. CAN YOU RECOMMEND SERVICE

PROVIDERS WHO CAN HELP ME

OBTAIN A MORTGAGE, MAKE

- HOME REPAIRS, AND HELP WITH OTHER THINGS I NEED DONE?
 Because REALTORS® are immersed in the industry, they're wonderful resources as you seek lenders, home improvement companies, and other home service providers. Practitioners should generally recommend more than one provider and let you know if they have any special relationship with or receive compensation from any of
- 9. WHAT TYPE OF SUPPORT
 AND SUPERVISION DOES YOUR
 BROKERAGE OFFICE PROVIDE
 TO YOU? Having resources such as
 in-house support staff, access to a real
 estate attorney, and assistance with

the providers.

technology can help an agent sell your home.

10. WHAT'S YOUR BUSINESS
PHILOSOPHY? While there's no right
answer to this question, the response
will help you assess what's important
to the agent and determine how closely
the agent's goals and business emphasis
mesh with your own.

11. HOW WILL YOU KEEP ME INFORMED ABOUT THE PROGRESS OF MY TRANSACTION? How

frequently? Again, this is not a question with a correct answer, but it reflects your desires. Do you want updates twice a week or do you not want to be bothered unless there's a hot prospect? Do you prefer phone, e-mail, or a personal visit?

12. COULD YOU PLEASE GIVE ME
THE NAMES AND PHONE NUMBERS
OF YOUR THREE MOST RECENT
CLIENTS? Ask recent clients if they
would work with this REALTOR* again.
Find out whether they were pleased
with the communication style, followup, and work ethic of the REALTOR*.

FIND A REAL ESTATE AGENT WHO YOU CONNECT WITH. Home buying is not only a big financial commitment, but also an emotional one. It's critical that the REALTOR* you chose is both highly skilled and a good fit with your personality.

REMEMBER, THERE'S NO "RIGHT"
TIME TO BUY, JUST AS THERE'S NO
PERFECT TIME TO SELL. If you find
a home now, don't try to second-guess
interest rates or the housing market by
waiting longer — you risk losing out on
the home of your dreams. The housing
market usually doesn't change fast
enough to make that much difference
in price, and a good home won't stay on
the market long.

DON'T ASK FOR TOO MANY OPINIONS. It's natural to want reassurance for such a big decision, but too many ideas from too many people will make it much harder to make a decision. Focus on the wants and needs of your immediate family — the people who will be living in the home.

ACCEPT THAT NO HOUSE IS EVER PERFECT. If it's in the right location,

the yard may be a bit smaller than you had hoped. The kitchen may be perfect, but the roof needs repair. Make a list of your top priorities and focus in on things that are most important to you. Let the minor ones go.

DON'T TRY TO BE A KILLER
NEGOTIATOR. Negotiation is
definitely a part of the real estate
process, but trying to "win" by getting
an extra-low price or by refusing to
budge on your offer may cost you the
home you love. Negotiation is give and
take.

REMEMBER YOUR HOME DOESN'T EXIST IN A VACUUM. Don't get so caught up in the physical aspects of the house itself — room size, kitchen, etc. — that you forget about important issues as noise level, location to amenities, and other aspects that also have a big impact on your quality of life.

PLAN AHEAD. Don't wait until you've found a home and made an offer to get approved for a mortgage, investigate home insurance, and consider a schedule for moving. Presenting an

offer contingent on a lot of unresolved issues will make your bid much less attractive to sellers.

FACTOR IN MAINTENANCE AND REPAIR COSTS IN YOUR POST-HOME BUYING BUDGET. Even if you buy a new home, there will be costs. Don't leave yourself short and let your home deteriorate.

ACCEPT THAT A LITTLE BUYER'S REMORSE IS INEVITABLE AND WILL PROBABLY PASS. Buying a home, especially for the first time, is a big financial commitment. But it also yields big benefits. Don't lose sight of why you wanted to buy a home and what made you fall in love with the property you purchased.

CHOOSE A HOME FIRST BECAUSE YOU LOVE IT; THEN THINK ABOUT APPRECIATION. While U.S. homes have appreciated an average of 5.4 percent annually over from 1998 to 2002, a home's most important role is to serve as a comfortable, safe place to live.

Common First-Time Home Buyer Mistakes

They don't ask enough questions of their lender and end up missing out on the best deal.

They don't act quickly enough to make a decision and someone else buys the house.

They don't find the right agent who's willing to help them through the homebuying process.

They don't do enough to make their offer look appealing to a seller.

They don't think about resale before they buy. The average first-time buyer only stays in a home for four years.

YOUR HOME SEARCH: 8 TIPS

- 1. Research before you look. Decide what features you most want to have in a home, what neighborhoods you prefer, and how much you'd be willing to spend each month for housing.
- **2. Be realistic.** It's OK to be picky, but don't be unrealistic with your expectations. There's no such thing as a perfect home. Use your list of priorities as a guide to evaluate each property.
- 3. Get your finances in order. Review your credit report and be sure you have enough money to cover your down payment and closing costs. Then, talk to a lender and get prequalified for a mortgage. This will save you the heartache later of falling in love with a house you can't afford.
- 4. Don't ask too many people for opinions. It will drive you crazy. Select one or two people to turn to if you feel you need a second opinion, but be ready to make the final decision on your own.

- 5. Decide your moving timeline. When is your lease up? Are you allowed to sublet? How tight is the rental market in your area? All of these factors will help you determine when you should move.
- 6. Think long term. Are you looking for a starter house with plans to move up in a few years, or do you hope to stay in this home for a longer period? This decision may dictate what type of home you'll buy as well as the type of mortgage terms that will best suit you.
- **7. Insist on a home inspection.** If possible, get a warranty from the seller to cover defects for one year.
- 8. Get help from a REALTOR®. Hire a real estate professional who specializes in buyer representation. Unlike a listing agent, whose first duty is to the seller, a buyer's representative is working only for you. Buyer's reps are usually paid out of the seller's commission payment.

FINDING THE PERFECT NEIGHBORHOOD

Your neighborhood has a big impact on your lifestyle. Follow these steps to find the perfect community to call home.

IS IT CLOSE TO YOUR FAVORITE

SPOTS? Make a list of the activities
— movies, health club, church, etc. —
you engage in regularly and stores you
visit frequently. See how far you would
have to travel from each neighborhood
you're considering to engage in your
most common activities.

CHECK OUT THE SCHOOL

DISTRICT. This is especially important if you have children, but it also can affect resale value. The Department of Education in your town can probably provide information on test scores, class size, percentage of students who attend college, and special enrichment programs. If you have school-age children, visit schools in

the neighborhoods you're considering. Also, check out www.schoolmatters. com.

FIND OUT IF THE NEIGHBORHOOD

IS SAFE. Ask the police department for neighborhood crime statistics. Consider not only the number of crimes but also the type — such as burglaries or armed robberies — and the trend of increasing or decreasing crime. Also, is crime centered in only one part of the neighborhood, such as near a retail area?

DETERMINE IF THE NEIGHBORHOOD IS ECONOMICALLY STABLE. Check

with your local city economic development office to see if income and property values in the neighborhood are stable or rising. What is the percentage of homes to apartments? Apartments don't necessarily diminish value, but do mean a more transient population. Do you see vacant businesses or homes that have been for

sale for months?

SEE IF YOU'LL MAKE MONEY.

Ask a local REALTOR® or call the local REALTOR® association to get information about price appreciation in the neighborhood. Although past performance is no guarantee of future results, this information may give you a sense of how good of an investment your home will be. A REALTOR® or the government planning agency also may be able to tell you about planned developments or other changes in the neighborhood — like a new school or highway — that might affect value.

MAKE PERSONAL OBSERVATIONS.

Once you've narrowed your focus to two or three neighborhoods, go there and walk around. Are homes tidy and well maintained? Are streets quiet? How does it feel? Pick a warm day if you can and chat with people working or playing outside.

TIPS FOR BUYING IN A TIGHT MARKET

Increase your chances of getting your dream house in a competitive housing market, and lower your chances of losing out to another buyer.

GET PREQUALIFIED FOR A MORTGAGE

You'll be able to make a firm commitment to buy and your offer will be more desirable to the seller.

STAY IN CLOSE CONTACT WITH YOUR REAL ESTATE AGENT TO FIND OUT ABOUT THE NEWEST LISTINGS

Be ready to see a house as soon as it goes on the market — if it's a great home, it will go fast.

SCOUT OUT NEW LISTINGS YOURSELF

Look at Web sites such as REALTOR. com, browse your local newspaper's real estate section, and drive through the neighborhood to spot For Sale signs. If you see a home you like, write down the address and the name of the listing agent. Your real estate agent will schedule a showing.

BE READY TO MAKE A DECISION

Spend a lot of time in advance deciding what you must have in a home so you won't be unsure when you have the chance to make an offer.

BID COMPETITIVELY

You may not want to start out offering the absolute highest price you can afford, but don't go too low to get a deal. In a tight market, you'll lose out. Keep contingencies to a minimum Restrictions such as needing to sell your home before you move or wanting to delay the closing until a certain date can make your offer unappealing. In a tight market, you'll probably be able to sell your house rapidly. Or talk to your lender about getting a bridge loan to cover both mortgages for a short period.

DON'T GET CAUGHT IN A BUYING FRENZY

Just because there's competition doesn't mean you should just buy it. And even though you want to make your offer attractive, don't neglect inspections that help ensure that your house is sound.

YOUR PROPERTY WISH LIST

What does your future home look like? Where is it located? As we hunt down your dream home, we'll consult this list to evaluate properties and keep your priorities top of mind.

7 REASONS TO OWN YOUR HOME

- 1. TAX BREAKS. The U.S. Tax Code lets you deduct the interest you pay on your mortgage, your property taxes, as well as some of the costs involved in buying your home.
- 2. APPRECIATION. Real estate has long-term, stable growth in value. While year-to-year fluctuations are normal, median existing-home sale prices have increased on average 6.5 percent each year from 1972 through 2005, and increased 88.5 percent over the last 10 years, according to the NATIONAL ASSOCIATION OF REALTORS*. In addition, the number of U.S. households is expected to rise 15 percent over the next decade,
- creating continued high demand for housing.
- 3. **EQUITY**. Money paid for rent is money that you'll never see again, but mortgage payments let you build equity ownership interest in your home.
- 4. **SAVINGS**. Building equity in your home is a ready-made savings plan. And when you sell, you can generally take up to \$250,000 (\$500,000 for a married couple) as gain without owing any federal income tax.
- 5. **PREDICTABILITY**. Unlike rent, your fixed-mortgage payments don't rise over the years so your housing costs

- may actually decline as you own the home longer. However, keep in mind that property taxes and insurance costs will increase.
- 6. FREEDOM. The home is yours. You can decorate any way you want and benefit from your investment for as long as you own the home.
- 7. **STABILITY.** Remaining in one neighborhood for several years gives you a chance to participate in community activities, lets you and your family establish lasting friendships, and offers your children the benefit of educational continuity.

5 PROPERTY TAX QUESTIONS YOU NEED TO ASK

- 1. What is the assessed value of the property? Note that assessed value is generally less than market value. Ask to see a recent copy of the seller's tax bill to help you determine this information.
- 2. How often are properties reassessed, and when was the last reassessment done? In general, taxes jump most significantly when a property is reassessed.
- 3. Will the sale of the property trigger a tax increase? The assessed value of the property may increase based on the amount you pay for the property. And in some areas, such as California, taxes may be frozen until resale.
- 4. Is the amount of taxes paid comparable to other properties in the area? If not, it might be possible to appeal the tax assessment and lower the rate.
- 5. Does the current tax bill reflect any special exemptions that I might not qualify for? For example, many tax districts offer reductions to those 65 or over

TAX BENEFITS OF HOMEOWNERSHIP

The tax deductions you're eligible to take for mortgage interest and property taxes greatly increase the financial benefits of homeownership.

HERE'S HOW IT WORKS. ASSUME:

\$9,877 = Mortgage interest paid (a loan of \$150,000 for 30 years, 7 percent, using year-five interest)

\$2,700 = Property taxes (at 1.5 percent on \$180,000 assessed value)

\$12,577 = Total deduction

Then, multiply your total deduction by your tax rate. For example, at a 28 percent tax rate: $12,577 \times 0.28 = \$3,521.56$

3,521.56 =Amount you have lowered your federal income tax (at 28 percent tax rate)

HOMEOWNER'S INSURANCE: 5 THINGS TO KNOW

KNOW ABOUT EXCLUSIONS TO

COVERAGE. For example, most insurance policies do not cover flood or earthquake damage as a standard item. These types of coverage must be bought separately.

KNOW ABOUT DOLLAR LIMITATIONS ON CLAIMS. Even if

you are covered for a risk, there may be a limit on how much the insurer will pay. For example, many policies limit the amount paid for stolen jewelry unless items are insured separately.

KNOW THE REPLACEMENT COST.

If your home is destroyed you'll receive money to replace it only to the maximum of your coverage, so be sure your insurance is sufficient. This means that if your home is insured for \$150,000 and it costs \$180,000 to replace it, you'll only receive \$150,000.

KNOW THE ACTUAL CASH VALUE.

If you chose not to replace your home when it's destroyed, you'll receive replacement cost, less depreciation. This is called actual cash value.

KNOW THE LIABILITY. Generally your homeowner's insurance covers you for accidents that happen to other people on your property, including medical care, court costs, and awards by the court. However, there is usually an upper limit to the amount of coverage provided. Be sure that it's sufficient if you have significant assets.

HOMEOWNER'S INSURANCE: LOWERING COSTS

1. REVIEW THE COMPREHENSIVE LOSS UNDERWRITING EXCHANGE (CLUE) REPORT ON THE PROPERTY YOU'RE INTERESTED IN BUYING.

CLUE reports detail the property's claims history for the most recent five years, which insurers may use to deny coverage. Make the sale contingent on a home inspection to ensure that problems identified in the CLUE report have been repaired.

2. SEEK INSURANCE COVERAGE AS SOON AS YOUR OFFER IS

APPROVED. You must obtain insurance to buy. And you don't want to be told at closing that the insurer has denied your coverage.

3. MAINTAIN GOOD CREDIT.

Insurers often use credit-based insurance scores to determine premiums.

4. BUY YOUR HOME OWNERS AND AUTO POLICIES FROM THE SAME

COMPANY AND YOU'LL USUALLY QUALIFY FOR SAVINGS. But make sure the discount really yields the lowest price.

5. RAISE YOUR DEDUCTIBLE. IF YOU CAN AFFORD TO PAY MORE TOWARD A LOSS THAT OCCURS, YOUR PREMIUMS WILL BE LOWER. Avoid making claims under \$1,000.

6. ASK ABOUT OTHER DISCOUNTS.
FOR EXAMPLE, RETIREES WHO
TEND TO BE HOME MORE THAN
FULL-TIME WORKERS MAY
QUALIFY FOR A DISCOUNT ON
THEFT INSURANCE. You also may
be able to obtain discounts for having
smoke detectors, a burglar alarm, or
dead-bolt locks.

7. SEEK GROUP DISCOUNTS. IF

you belong to any groups, such as associations or alumni organizations, they may have deals on insurance coverage.

8. REVIEW YOUR POLICY LIMITS AND THE VALUE OF YOUR HOME AND POSSESSIONS ANNUALLY. Some items depreciate and may not

Some items depreciate and may not need as much coverage.

9. INVESTIGATE A GOVERNMENT-BACKED INSURANCE PLAN. In some high-risk areas, federal or state government may back plans to lower rates. Ask your agent.

10. BE SURE YOU INSURE YOUR
HOUSE FOR THE CORRECT
AMOUNT. Remember, you're covering
replacement cost, not market value.

GET YOUR FINANCES IN ORDER: TO-DO LIST

DEVELOP A HOUSEHOLD BUDGET

Instead of creating a budget of what you'd like to spend, use receipts to create a budget that reflects your actual spending habits over the last several months. This approach will factor in unexpected expenses, such as car repairs, as well as predictable costs such as rent, utility bills, and groceries.

REDUCE YOUR DEBT

Lenders generally look for a total debt load of no more than 36 percent of income. This figure includes your mortgage, which typically ranges between 25 and 28 percent of your net household income. So you need to get monthly payments on the rest of your installment debt — car loans, student loans, and revolving balances on credit cards — down to between 8 and 10 percent of your net monthly income.

LOOK FOR WAYS TO SAVE

You probably know how much you spend on rent and utilities, but little expenses add up, too. Try writing down everything you spend for one month. You'll probably spot some great ways to save, whether it's cutting out that morning trip to Starbucks or eating dinner at home more often.

INCREASE YOUR INCOME

Now's the time to ask for a raise! If that's not an option, you may want to consider taking on a second job to get your income at a level high enough to qualify for the home you want.

SAVE FOR A DOWN PAYMENT

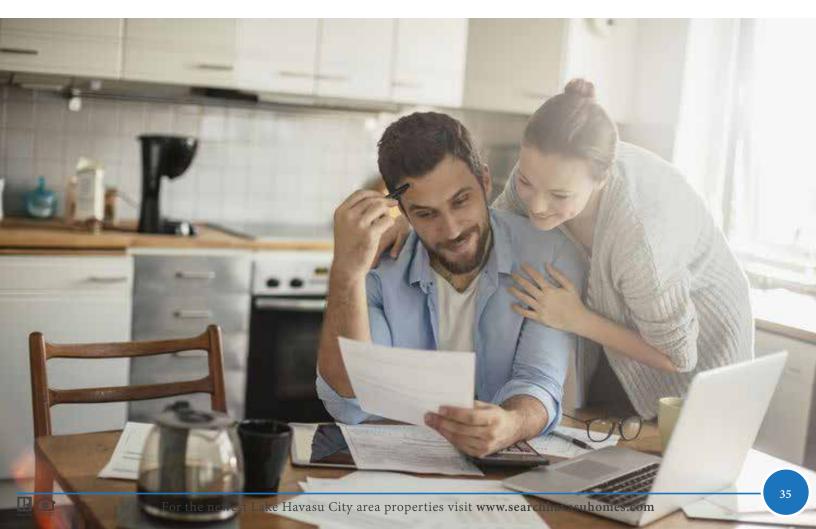

Designate a certain amount of money each month to put away in your savings account. Although it's possible to get a mortgage with only 5 percent down, or even less, you can usually get a better rate if you put down a larger percentage of the total purchase. Aim for a 20 percent down payment.

KEEP YOUR JOB

While you don't need to be in the same job forever to qualify for a home loan, having a job for less than two years may mean you have to pay a higher interest rate.

GOOD CREDIT HISTORY

Get a credit card and make payments by the due date. Do the same for all your other bills, too. Pay off the entire balance promptly.

INCOME

BUDGET BASICS WORKSHEET

The first step in getting yourself in financial shape to buy a home is to know exactly how much money comes in and how much goes out. Use this worksheet to list your income and expenses below.

EXPENSES

Household Income	Rent/Mortgage

(Subtract Total Income from Total Expenses)

REMAINING INCOME AFTER EXPENSES

LENDER CHECKLIST: GET A MORTGAGE

When it comes to preparing paperwork for your lending appointment there is a bit of a grey area because different banks (or alternative lending institutions) may require different things. However, there are some key items that usually required when you apply.

W-2 forms or business tax return forms if you're self-employed — for the last two or three years for every person signing the loan.
Copies of at least one pay stub for each person signing the loan.
Account numbers of all your credit cards and the amounts for any outstanding balances.
Copies of two to four months of bank or credit union statements for both checking and savings accounts.
Lender, loan number, and amount owed on other installment loans, such as student loans and car loans.
Addresses where you've lived for the last five to seven years, with names of landlords if appropriate.
Copies of brokerage account statements for two to four months, as well as a list of any other major assets of value, such as a boat, RV, or stocks or bonds not held in a brokerage account.
Copies of your most recent 401(k) or other retirement account statement.
Documentation to verify additional income, such as child support or a pension.
Copies of personal tax forms for the last two to three years.

10 Questions to Ask Your Lender

- 1. What are the most popular mortgages you offer? Why are they so popular?
- **2.** Which type of mortgage plan do you think would be best for me? Why?
- **3.** Are your rates, terms, fees, and closing costs negotiable?
- 4. Will I have to buy private mortgage insurance? If so, how much will it cost, and how long will it be required? (NOTE: Private mortgage insurance is usually required if your down payment is less than 20 percent. However, most lenders will let you discontinue PMI when you've acquired a certain amount of equity by paying down the loan.)
- **5.** Who will service the loan your bank or another company?
- **6.** What escrow requirements do you have?
- 7. How long will this loan be in a lock-in period (in other words, the time that the quoted interest rate will be honored)? Will I be able to obtain a lower rate if it drops during this period?
- **8.** How long will the loan approval process take?
- **9.** How long will it take to close the loan?
- **10.** Are there any charges or penalties for prepaying the loan?

YOUR CREDIT SCORE: 5 FACTORS

Credit scores range between 200 and 800, with scores above 620 considered desirable for obtaining a mortgage. The following factors affect your score:

- 1. YOUR PAYMENT HISTORY. Did you pay your credit card obligations on time? If they were late, then how late? Bankruptcy filing, liens, and collection activity also impact your history.
- 2. HOW MUCH YOU OWE. If you owe a great deal of money on numerous accounts, it can indicate that you are overextended. However, it's a good thing if you have a good proportion of balances to total credit limits.
- 3. THE LENGTH OF YOUR CREDIT HISTORY. In general, the longer you have had accounts opened, the better. The average consumer's oldest

obligation is 14 years old, indicating that he or she has been managing credit for some time, according to Fair Isaac Corp., and only one in 20 consumers have credit histories shorter than 2 years.

- 4. HOW MUCH NEW CREDIT YOU HAVE. New credit, either installment payments or new credit cards, are considered more risky, even if you pay them promptly.
- 5. THE TYPES OF CREDIT YOU USE. Generally, it's desirable to have more than one type of credit installment loans, credit cards, and a mortgage, for example.

IMPROVE YOUR CREDIT

Credit scores, along with your overall income and debt, are big factors in determining whether you'll qualify for a loan and what your loan terms will be. So, keep your credit score high by doing the following:

- 1. Check for and correct any errors in your credit report.
- 2. Pay down credit card bills. If possible, pay off the entire balance every month.
- 3. Don't charge your credit cards to the maximum limit.
- 4. Wait 12 months after credit difficulties to apply for a mortgage.
- 5. Don't order expensive items for your new home on credit until after the loan is approved.

- 6. Don't open new credit card accounts before applying for a mortgage.
- 7. Shop for mortgage rates all at once. Too many credit applications can lower your score, but multiple inquiries from the same type of lender are counted as one inquiry if submitted over a short period of time.
- 8. Avoid finance companies. Even if you pay the loan on time, the interest is high and it will probably be considered a sign of poor credit management.

LOAN TYPES TO CONSIDER

Brush up on these mortgage basics to help you determine the loan that will best suit your needs.

MORTGAGE TERMS. Mortgages are generally available at 15-, 20-, or 30-year terms. In general, the longer the term, the lower the monthly payment. However, you pay more interest overall if you borrow for a longer term.

FIXED OR ADJUSTABLE INTEREST

RATES. A fixed rate allows you to lock in a low rate as long as you hold the mortgage and, in general, is usually a good choice if interest rates are low. An adjustable-rate mortgage is designed so that your loan's interest rate will rise as market interest rates increase. ARMs usually offer a lower rate in the first years of the mortgage. ARMs also usually have a limit as to how much the

interest rate can be increased and how frequently they can be raised. These types of mortgages are a good choice when fixed interest rates are high or when you expect your income to grow significantly in the coming years.

BALLOON MORTGAGES. These mortgages offer very low interest rates for a short period of time — often three to seven years. Payments usually cover only the interest so the principal owed is not reduced. However, this type of loan may be a good choice if you think you will sell your home in a few years.

GOVERNMENT-BACKED LOANS.

These loans are sponsored by agencies such as the Federal Housing Administration (www.fha.gov) or the Department of Veterans Affairs (www.va.gov) and offer special terms, including lower down payments or reduced interest rates to qualified buyers.

Slight variations in interest rates, loan amounts, and terms can significantly affect your monthly payment. For help in determining how much your monthly payment will be for various loan amounts, use Fannie Mae's online mortgage calculators.

SPECIALTY MORTGAGES: RISKS AND REWARDS

In high-priced housing markets, it can be difficult to afford a home. That's why a growing number of home buyers are forgoing traditional fixed-rate mortgages and standard adjustable-rate mortgages and instead opting for a specialty mortgage that lets them "stretch" their income so they can qualify for a larger loan.

But before you choose one of these mortgages, make sure you understand the risks and how they work.

Specialty mortgages often begin with a low introductory interest rate or payment plan — a "teaser"— but the monthly mortgage payments are likely to increase a lot in the future. Some are "low documentation" mortgages that come with easier standards for qualifying, but also higher interest rates or higher fees. Some lenders will loan you 100 percent or more of the home's value, but these mortgages can present a big financial risk if the value of the house drops.

SPECIALTY MORTGAGES CAN:

- Pose a greater risk that you won't be able to afford the mortgage payment in the future, compared to fixed rate mortgages and traditional adjustable rate mortgages.
- Have monthly payments that increase by as much as 50 percent or more when the introductory period ends.
- Cause your loan balance (the amount you still owe) to get larger each month instead of smaller.

COMMON TYPES OF SPECIALTY MORTGAGES:

• Interest-Only Mortgages: Your

monthly mortgage payment only covers the interest you owe on the loan for the first 5 to 10 years of the loan, and you pay nothing to reduce the total amount you borrowed (this is called the "principal"). After the interest-only period, you start paying higher monthly payments that cover both the interest and principal that must be repaid over the remaining term of the loan.

- Negative Amortization
 Mortgages: Your monthly
 payment is less than the amount
 of interest you owe on the loan.
 The unpaid interest gets added
 to the loan's principal amount,
 causing the total amount you owe
 to increase each month instead of
 getting smaller.
- Option Payment ARM
 Mortgages: You have the option
 to make different types of
 monthly payments with this
 mortgage. For example, you may
 make a minimum payment that
 is less than the amount needed to
 cover the interest and increases
 the total amount of your loan;
 an interest-only payment, or
 payments calculated to pay off
 the loan over either 30 years or
 15 years.
- 40-Year Mortgages: You pay off your loan over 40 years, instead of the usual 30 years. While this

reduces your monthly payment and helps you qualify to buy a home, you pay off the balance of your loan much more slowly and end up paying much more interest.

QUESTIONS TO CONSIDER BEFORE CHOOSING A SPECIALTY MORTGAGE:

- How much can my monthly payments increase and how soon can these increases happen?
- Do I expect my income to increase or do I expect to move before my payments go up?
- Will I be able to afford the mortgage when the payments increase?
- Am I paying down my loan balance each month, or is it staying the same or even increasing?
- Will I have to pay a penalty if I refinance my mortgage or sell my house?
- What is my goal in buying this property? Am I considering a riskier mortgage to buy a more expensive house than I can realistically afford?

Be sure you work with a REALTOR® and lender who can discuss different options and address your questions and concerns!

6 CREATIVE WAYS TO AFFORD A HOME

INVESTIGATE LOCAL, STATE, AND NATIONAL DOWN PAYMENT ASSISTANCE PROGRAMS.

These programs give qualified applicants loans or grants to cover all or part of your required down payment. National programs include the Nehemiah program, www. getdownpayment.com, and the American Dream Down Payment Fund from the Department of Housing and Urban Development, www.hud.gov.

EXPLORE SELLER FINANCING.

In some cases, sellers may be willing to finance all or part of the purchase price of the home and let you repay them gradually, just as you would do with a mortgage.

CONSIDER A SHARED

APPRECIATION OR SHARED EQUITY ARRANGEMENT.

Under this arrangement, your family, friends, or even a third-party may buy a portion of the home and share in any appreciation when the home is sold. The owner/occupant usually pays the mortgage, property taxes, and maintenance costs, but all the investors' names are usually on the mortgage. Companies are available that can help you find such an investor, if your family can't participate.

ASK YOUR FAMILY FOR HELP. PERHAPS A FAMILY MEMBER WILL LOAN YOU MONEY FOR THE DOWN PAYMENT OR ACT AS A CO-SIGNER FOR THE MORTGAGE.

Lenders often like to have a co-signer if you have little credit history.

LEASE WITH THE OPTION TO BUY.

Renting the home for a year or more will give you the chance to save more toward your down payment. And in many cases, owners will apply some of the rental amount toward the purchase price. You usually have to pay a small, nonrefundable option fee to the owner.

CONSIDER A SHORT-TERM SECOND MORTGAGE.

If you can qualify for a short-term second mortgage, this would give you money to make a larger down payment. This may be possible if you're in good financial standing, with a strong income and little other debt.

WHAT A HOME INSPECTION SHOULD COVER

Home inspections will vary depending on the type of property you are purchasing. A large historic home, for example, will require a more specialized inspection than a small condominium. However, the following are the basic elements that a home inspector will check. You can also use this list to help you evaluate properties you might purchase.

STRUCTURE: A home's skeleton impacts how the property stands up to weather, gravity, and the earth. Structural components, including the foundation and the framing, should be inspected.

EXTERIOR: The inspector should look at sidewalks, driveways, steps, windows, and doors. A home's siding, trim, and surface drainage also are part of an exterior inspection.

- Doors and windows
- Siding
- Driveways/sidewalks
- Attached porches, decks, and balconies

ROOFING: A well-maintained roof protects you from rain, snow, and other forces of nature. Take note of the roof's age, conditions of flashing, roof draining systems (pooling water), buckled shingles, loose gutters and downspouts, skylight, and chimneys.

PLUMBING: Thoroughly examine the water supply and drainage systems, water heating equipment, and fuel storage systems. Drainage pumps

and sump pumps also fall under this category. Poor water pressure, banging pipes, rust spots, or corrosion can indicate problems.

ELECTRICAL: Safe electrical wiring is essential. Look for the condition of service entrance wires, service panels, breakers and fuses, and disconnects. Also take note of the number of outlets in each room.

HEATING: The home's heating system, vent system, flues, and chimneys should be inspected. Look for age of water heater, whether the size is adequate for the house, speed of recovery, and energy rating.

AIR CONDITIONING: Your inspector should describe your home cooling system, its energy source, and inspect the central and through-wall cooling equipment. Consider the age and energy rating of the system.

INTERIORS: An inspection of the inside of the home can reveal plumbing leaks, insect damage, rot, construction defects, and other issues. An inspector should take a close look at:

- Walls, ceilings and floors
- Steps, stairways, and railings
- Countertops and cabinets
- Garage doors and garage door systems

VENTILATION/INSULATION: To

prevent energy loss, check for adequate insulation and ventilation in the attic and in unfinished areas such as crawlspaces. Also look for proper, secured insulation in walls. Insulation should be appropriate for the climate. Excess moisture in the home can lead to mold and water damage.

FIREPLACES: They're charming, but they could be dangerous if not properly installed. Inspectors should examine the system, including the vent and flue, and describe solid fuel burning appliances.

For more information, try the virtual home inspection at www.ASHI.org, the Web site of the American Society of Home Inspectors.

10 QUESTIONS TO ASK HOME INSPECTORS

Before you make your final buying or selling decision, you should have the home inspected by a professional. An inspection can alert you to potential problems with a property and allow you to make an informed decision. Ask these questions to prospective home inspectors:

1. WILL YOUR INSPECTION MEET RECOGNIZED STANDARDS?

Ask whether the inspection and the inspection report will meet all state requirements and comply with a well-recognized standard of practice and code of ethics, such as the one adopted by the American Society of Home Inspectors or the National Association of Home Inspectors. Customers can view each group's standards of practice and code of ethics online at www.ashi. org or www.nahi.org. ASHI's Web site also provides a database of state regulations.

2. DO YOU BELONG TO A PROFESSIONAL HOME INSPECTOR ASSOCIATION?

There are many state and national associations for home inspectors, including the two groups mentioned in No. 1. Unfortunately, some groups confer questionable credentials or certifications in return for nothing more than a fee. Insist on members of reputable, nonprofit trade organizations; request to see a membership ID.

3. HOW EXPERIENCED ARE YOU?

Ask how long inspectors have been in the profession and how many inspections they've completed. They should provide customer referrals on request. New inspectors also may be highly qualified, but they should describe their training and let you

know whether they plan to work with a more experienced partner.

4. HOW DO YOU KEEP YOUR EXPERTISE UP TO DATE?

Inspectors' commitment to continuing education is a good measure of their professionalism and service. Advanced knowledge is especially important in cases in which a home is older or includes unique elements requiring additional or updated training.

5. DO YOU FOCUS ON RESIDENTIAL INSPECTION?

Make sure the inspector has training and experience in the unique discipline of home inspection, which is very different from inspecting commercial buildings or a construction site. If your customers are buying a unique property, such as a historic home, they may want to ask whether the inspector has experience with that type of property in particular.

6. WILL YOU OFFER TO DO REPAIRS OR IMPROVEMENTS?

Some state laws and trade associations allow the inspector to provide repair work on problems uncovered during the inspection. However, other states and associations forbid it as a conflict of interest. Contact your local ASHI chapter to learn about the rules in your state.

7. HOW LONG WILL THE INSPECTION TAKE?

On average, an inspector working alone inspects a typical single-family house in two to three hours; anything significantly less may not be thorough. If your customers are purchasing an especially large property, they may want to ask whether additional inspectors will be brought in.

8. WHAT'S THE COST?

Costs can vary dramatically, depending on your region, the size and age of the house, and the scope of services. The national average for single-family homes is about \$320, but customers with large homes can expect to pay more. Customers should be wary of deals that seem too good to be true.

9. WHAT TYPE OF INSPECTION REPORT DO YOU PROVIDE?

Ask to see samples to determine whether you will understand the inspector's reporting style. Also, most inspectors provide their full report within 24 hours of the inspection.

10. WILL I BE ABLE TO ATTEND THE INSPECTION?

The answer should be yes. A home inspection is a valuable educational opportunity for the buyer. An inspector's refusal to let the buyer attend should raise a red flag.

5 THINGS TO KNOW ABOUT TITLE INSURANCE

Title insurance protects the holder from any losses sustained from defects in the title. It's required by most mortgage lenders. Here are five other things you should know about title insurance.

- 1. It protects your ownership right to your home, both from fraudulent claims against your ownership and from mistakes made in earlier sales, such as mistake in the spelling of a person's name or an inaccurate description of the property.
- 2. It's a **one-time cost** usually based on the price of the property.
- 3. It's usually **paid for by the sellers**, although this can vary depending on your state and local customs.
- 4. There are both **lender title policies**, which protect the lender, and **owner title policies**, which protect you. The lender will probably require a lender policy.
- 5. Discounts on premiums are sometimes available if the home has been bought within only a few years since not as much work is required to check the title. Ask the title company if this discount is available.

WHAT'S A HOME WARRANTY?

A home warranty is a service contract, normally for one year, which helps protect home owners against the cost of unexpected covered repairs or replacement on their major systems and appliances that break down due to normal wear and tear. Coverage is for systems and appliances in good working order at the start of the contract.

Check your home warranty policy to see which of the following items are covered. Also find out if the policy covers the full replacement cost of an item.

- Plumbing
- · Electrical systems
- Furnace
- Water heater
- Heating ducts
- Water pump
- Dishwasher

- Garbage disposal
- Stove/cooktop/ovens
- Microwave
- Refrigerator
- Washer/dryer
- Swimming pool (may be optional)

HOMEOWNER'S INSURANCE: 5 THINGS TO KNOW

KNOW ABOUT EXCLUSIONS TO

COVERAGE. For example, most insurance policies do not cover flood or earthquake damage as a standard item. These types of coverage must be bought separately.

KNOW ABOUT DOLLAR

LIMITATIONS ON CLAIMS. Even if you are covered for a risk, there may be a limit on how much the insurer will pay. For example, many policies limit the amount paid for stolen jewelry unless items are insured separately.

KNOW THE REPLACEMENT COST.

If your home is destroyed you'll receive money to replace it only to the maximum of your coverage, so be sure your insurance is sufficient. This means that if your home is insured for \$150,000 and it costs \$180,000 to replace it, you'll only receive \$150,000.

KNOW THE ACTUAL CASH VALUE.

If you chose not to replace your home when it's destroyed, you'll receive replacement cost, less depreciation. This is called actual cash value.

KNOW THE LIABILITY. Generally your homeowner's insurance covers you for accidents that happen to other people on your property, including medical care, court costs, and awards by the court. However, there is usually an upper limit to the amount of coverage provided. Be sure that it's sufficient if you have significant assets.

HOMEOWNER'S INSURANCE: LOWERING COSTS

- 1. Review the Comprehensive Loss Underwriting Exchange (CLUE) report policies from the same company and on the property you're interested in buying. CLUE reports detail the property's claims history for the most recent five years, which insurers may use to deny coverage. Make the sale contingent on a home inspection to ensure that problems identified in the CLUE report have been repaired.
- 2. Seek insurance coverage as soon as your offer is approved. You must obtain insurance to buy. And you don't want to be told at closing that the insurer has denied your coverage.
- 3. Maintain good credit. Insurers often use credit-based insurance scores to determine premiums.

- 4. Buy your home owners and auto you'll usually qualify for savings. But make sure the discount really yields the lowest price.
- 5. Raise your deductible. If you can afford to pay more toward a loss that occurs, your premiums will be lower. Avoid making claims under \$1,000.
- 6. Ask about other discounts. For example, retirees who tend to be home more than full-time workers may qualify for a discount on theft insurance. You also may be able to obtain discounts for having smoke detectors, a burglar alarm, or dead-bolt locks.

- 7. Seek group discounts. If you belong to any groups, such as associations or alumni organizations, they may have deals on insurance coverage.
- 8. Review your policy limits and the value of your home and possessions annually. Some items depreciate and may not need as much coverage.
- 9. Investigate a government-backed insurance plan. In some high-risk areas, federal or state government may back plans to lower rates. Ask your agent.
- 10. Be sure you insure your house for the correct amount. Remember, you're covering replacement cost, not market value.

WHAT NOT TO OVERLOOK ON A FINAL WALK-THROUGH

It's guaranteed to be hectic right before closing, but you should always make time for a final walk-through. Your goal is to make sure that your home is in the same condition you expected it would be. Ideally, the sellers already have moved out. This is your last chance to check that appliances are in working condition and that agreed-upon repairs have been made. Here's a detailed list of what not to overlook for on your final walk-through.

- Repairs you've requested have been made. Obtain copies of paid bills and warranties.
- There are no major changes to the property since you last viewed it.
- All items that were included in the sale price — draperies, lighting fixtures, etc. — are still there.
- Screens and storm windows are in place or stored.

- All appliances are operating, such as the dishwasher, washer and dryer, oven, etc.
- Intercom, doorbell, and alarm are operational.
- Hot water heater is working.
- No plants or shrubs have been removed from the yard.
- · Heating and air conditioning system is working

- Garage door opener and other remotes are available.
- Instruction books and warranties on appliances and fixtures are available.
- All personal items of the sellers and all debris have been removed. Check the basement, attic, and every room, closet, and crawlspace.

COMMON CLOSING COSTS FOR BUYERS

You'll likely be responsible for a variety of fees and expenses that you and the seller will have to pay at the time of closing. Your lender must provide a good-faith estimate of all settlement costs. The title company or other entity conducting the closing will tell you the required amount for:

- Down payment
- Loan origination
- Points, or loan discount fees, which you pay to receive a lower interest rate
- Home inspection
- Appraisal
- · Credit report
- Private mortgage insurance premium

- Insurance escrow for homeowner's insurance, if being paid as part of the mortgage
- Property tax escrow, if being paid as part of the mortgage.
 Lenders keep funds for taxes and insurance in escrow accounts as they are paid with the mortgage, then pay the insurance or taxes for you.
- Deed recording

- Title insurance policy premiums
- Land survey
- Notary fees
- Prorations for your share of costs, such as utility bills and property taxes

A NOTE ABOUT PRORATIONS: Because such costs are usually paid on either a monthly or yearly basis, you might have to pay a bill for services used by the sellers before they moved. Proration is a way for the sellers to pay you back or for you to pay them for bills they may have paid in advance. For example, the gas company usually sends a bill each month for the gas used during the previous month. But assume you buy the home on the 6th of the month. You would owe the gas company for only the days from the 6th to the end for the month. The seller would owe for the first five days. The bill would be prorated for the number of days in the month, and then each person would be responsible for the days of his or her ownership.

CLOSING DOCUMENTS YOU SHOULD KEEP

On closing day, expect to sign a lot of documents and walk away with a big stack of papers. Here's a list of the most important documents you should file away for future reference.

SETTLEMENT STATEMENT

Itemizes all the costs — commissions, loan fees, points, and hazard insurance —associated with the closing. You'll need it for income tax purposes if you paid points.

TRUTH IN LENDING STATEMENT

Summarizes the terms of your mortgage loan, including the annual percentage rate and recision period.

MORTGAGE AND NOTE

Spell out the legal terms of your mortgage obligation and the agreed-upon repayment terms.

DEED

Transfers ownership to you.

AFFIDAVITS

Binding statements by either party. For example, the sellers will often sign an affidavit stating that they haven't incurred any liens.

RIDERS

Amendments to the sales contract that affect your rights. Example: The sellers won't move out until two weeks after closing but will pay rent to the buyers during that period.

INSURANCE POLICIES

Provide a record and proof of your coverage.

Moving to a new home can be stressful, to say the least. Make it easy on yourself by planning far in advance and making sure you've covered all the bases.

- 1. PLAN AHEAD BY ORGANIZING AND BUDGETING. Develop a master "to do" list so you won't forget something critical on moving day, and create an estimate of moving costs.
- 2. SORT AND GET RID OF THINGS YOU NO LONGER WANT OR NEED. Have a garage sale, donate to a charity, or recycle.
- 3. BUT DON'T THROW OUT
 EVERYTHING. If your inclination is to just toss it, you're probably right.
 However, it's possible to go overboard in the heat of the moment. Ask yourself how frequently you use an item and how you'd feel if you no longer had it.
 That will eliminate regrets after the move.
- 4. PACK SIMILAR ITEMS
 TOGETHER. Put toys with toys,
 kitchen utensils with kitchen utensils. It
 will make your life easier when it's time
 to unpack.
- 5. DECIDE WHAT, IF ANYTHING, YOU PLAN TO MOVE ON YOUR

OWN. Precious items such as family photos, valuable breakables, or must-haves during the move should probably stay with you. Don't forget to keep a "necessities" bag with tissues, snacks, and other items you'll need that day.

- 6. REMEMBER, MOST MOVERS WON'T TAKE PLANTS. If you don't want to leave them behind, you should plan on moving them yourself.
- 7. USE THE RIGHT BOX FOR THE ITEM. Loose items are prone to breakage.
- 8. PUT HEAVY ITEMS IN SMALL BOXES SO THEY'RE EASIER TO LIFT. Keep the weight of each box under 50 pounds, if possible.
- 9. DON'T OVER-PACK BOXES. It increases the likelihood that items inside the box will break.
- 10. WRAP EVERY FRAGILE ITEM
 SEPARATELY AND PAD BOTTOM
 AND SIDES OF BOXES. If necessary,
 purchase bubble-wrap or other packing
 materials from moving stores.
- 11. LABEL EVERY BOX ON ALL SIDES. You never know how they'll be stacked and you don't want to have to move other boxes aside to find out what's there.
- 12. USE COLOR-CODED LABELS TO

INDICATE WHICH ROOM EACH ITEM SHOULD GO IN. Color-code a floor plan for your new house to help movers.

13. KEEP YOUR MOVING DOCUMENTS TOGETHER IN

A FILE. Include important phone numbers, driver's name, and moving van number. Also keep your address book handy.

- 14. PRINT OUT A MAP AND DIRECTIONS FOR MOVERS. Make several copies, and highlight the route. Include your cell phone number on the map. You don't want movers to get lost! Also make copies for friends or family who are lending a hand on moving day.
- 15. BACK UP YOUR COMPUTER
 FILES BEFORE MOVING YOUR
 COMPUTER. Keep the backup in a safe
 place, preferably at an off-site location.
- 16. INSPECT EACH BOX AND ALL FURNITURE FOR DAMAGE AS SOON AS IT ARRIVES.

17. MAKE ARRANGEMENTS FOR SMALL CHILDREN AND PETS.

Moving can be stressful and emotional. Kids can help organize their things and pack boxes ahead of time, but, if possible, it might be best to spare them from the moving-day madness.
